AMENDMENTS TO THE CLAIMS

This listing of claims will replace all prior versions and listings of claims in the application:

LISTING OF CLAIMS:

- (Original) An amplifier system (1) for satellites including:
 first and second amplifier modules (A₁, A₂) each having an input and an output,
 a signal divider (D) having an input, a first output, and a second output,
- a signal combiner (C) having a first input, a second input and an output, said first output of said divider (D) being connected to said input of said first amplifier module (A_1) via a connection length Le_1 , said second output of said divider (D) being connected to said input of said second amplifier module (A_2) via a connection length Le_2 , said output of said first amplifier module (A_1) being connected to said first input of said combiner (C) via a connection length Ls_1 , said output of said second amplifier module (A_2) being connected to said second input of said combiner (C) via a connection length Ls_2 , and said connection length satisfying the equation $Le_1 + Ls_1 = Le_2 + Ls_2$, which system is characterized in that the connection length Ls_1 is different from the connection length Ls_2 .
- 2. (Original) An amplifier system (1) for satellites according to claim 1 characterized in that said length Le₁ is equal to said length Ls₂ and said length Le₂ is equal to said length Ls₁.

- 3. (Currently Amended) An amplifier system (1) for satellites according to either elaim 1 or claim 2 claim 1 characterized in that at least one of said amplifier modules (A_1, A_2) is a traveling wave tube amplifier.
- 4. (Original) An amplifier system (1) for satellites according to claim 1 characterized in that at least one of said amplifier modules is a semiconductor SSPA.
- 5. (Original) An amplifier system (1) for satellites according to claim 1 characterized in that the connections between the outputs of said amplifier modules and the input of said combiner are waveguides.
- 6. (Original) An amplifier system (1) for satellites according to claim 1 characterized in that at least one of said amplifier modules (2) includes:

first and second amplifier submodules (A₁, A₂) each having an input and an output, a signal divider (d) having an input, a first output, and a second output, and a signal combiner (c) having a first input, a second input, and an output, said first output of said divider (d) being connected to said input of said first amplifier submodule (A₁) via a connection length Le₁₁,

said second output of said divider (d) being connected to said input of said second amplifier submodule (A_2) via a connection length Le_{12} ,

Preliminary Amendment Attorney Docket Q76606

said output of said first amplifier submodule (A_2) being connected to said first input of said combiner via a connection length Ls_{11} ,

said output of said second amplifier submodule being connected to said second input of said combiner via a connection length Ls_{12} ,

said connection lengths satisfying the equation $Le_{11} + Ls_{11} = Le_{12} + Ls_{12}$, and the connection length Ls_{11} being different from the connection length Ls_{12} .
